PROFESSIONAL SUMMARY

Product Designer & Frontend Developer with a strong foundation in UI/UX and building user-centered web applications. Skilled in translating complex workflows into clear, intuitive interfaces used in enterprise, healthcare, and operational environments.

I specialize in designing **dashboards, admin systems, operational tools, and structured workflows** that balance clarity, functionality, and user empathy. With experience collaborating across engineering, product, and operations teams, I bring a design approach rooted in problem-solving, logic, and simplicity.

Passionate about designing experiences that *work* not just look good and bringing structure to complex systems.

CORE SKILLS

Product & UX Skills

- User Research & Requirements Gathering

- UX Flows • Wireframing • Prototyping

- Dashboard & Admin Interface Design

Technical Skills

- Figma,Visily ,Canva

- JavaScript

- Vue.js, React, Vite

- HTML, CSS, Tailwind

- Node.js, MongoDB

- Git & Version Control

Soft Skills

- Communication & Collaboration

- Attention to Detail

- Problem-Solving

- Adaptability

- Leadership

- Fast Learning

EXPERIENCE

Software Engineering Apprentice — RHIP Factory (FundEzer), Nigeria

June 2025 – December 2025

Worked on an AI-powered healthcare crowdfunding platform focusing on **user experience, visual design consistency, and frontend implementation**.

Key Contributions

- **UX/UI Improvement:** Contributed to designing campaigner and hospital dashboards to improve usability, accessibility, and clarity.

- **User Flows:** Designed and implemented smooth flows for user registration, donations, and campaign management.

- **API Integration:** Integrated REST APIs to ensure seamless UI functionality and system consistency.

- **Trust & Transparency Features:** Designed interactions for verification, reporting, and real-time donor updates.

- **Multi-payment User Experience:** Supported creation of a clean payment flow integrating mobile money, bank transfer, and card payments.

- **Collaboration:** Worked in an agile team of six, partnering with product managers, designers, and developers.

- **Continuous Learning:** Completed an intensive bootcamp covering modern frontend frameworks, design principles, and system workflows.

PROJECTS

KGL Produce Management System (Enterprise Operational Tool)

Role: Product Designer & Frontend Developer
 Tech: JavaScript, MongoDB, HTML, Bootstrap

Designed and built a **role-based operational management system** for a wholesale produce distributor.

Key Product Design Achievements

- **Dashboard Design:** Designed clear dashboards for managers, directors, and sales agents with role-specific insights.

- **Complex to Simple:** Simplified procurement, credit sales, and produce tracking workflows into intuitive, step-by-step interfaces.

- **Design System:** Created reusable UI components and consistent layouts.

- **User Experience:** Focused on clarity, predictability, and reducing confusion across high-volume operational tasks.

- **Secure Auth UX:** Designed UX for a multi-role authentication system.

- **Scalable Structure:** Ensured interfaces could expand to include analytics, reporting, and inventory forecasting.

Personal Portfolio Website

Designed and developed a responsive portfolio showcasing UX processes, project case studies, and interactive UI sections.
Demonstrated strong understanding of layout, hierarchy, visual consistency, and content organization.

EDUCATION

Certificate in Software Engineering (JavaScript)
Refactory Academy
February 2025 – May 2025

Uganda Advanced Certificate of Education
Seeta High School — Green Campus
2016 – 2017

Uganda Certificate of Education
Seeta High School — Green Campus
2012 – 2015

LANGUAGES

- English

- Luganda
